SUMMARY

Java Developer with 4 years of experience in full software lifecycle management. Proficient in Java SE/EE, Spring Framework, Hibernate, and dynamic web applications. Strong skills in RESTful API development and Agile methodologies.

TECHNICAL SKILLS

Language: Core Java, Advance Java, OOPs, Java APIs

Frameworks: Spring Boot, Spring MVC, Hibernate, JPA, Spring Security, API Integration, Rest API

Web Technologies: HTML, CSS, JavaScript, JSP, React JS

Databases: MySQL, PostgreSQL,

Tools & Platforms: Eclipse, IntelliJ IDEA, Postman, Git, GitHub, Swagger, GitHubAction CI/CD Docker

Testing: JUnit, Mockito

Build Tools: Maven, Gradle

Version Control: Git

Deployment & Others: Docker (Basic), RESTful APIs, Agile/Scrum, Web Services, AWS

OFFICE TOOLS: Microsoft Word, Excel, PowerPoint

EXPERIENCE:

Software Engineer | Armantec Systems Private Limited **22/03/2022– Present**

- Developed and maintained scalable **Java-based applications** tailored to client requirements, ensuring adherence to industry best practices.
- Designed and implemented robust **RESTful APIs** using **Spring Boot** and integrated with databases like MySQL.
- Collaborate with frontend teams to define **API specifications** and ensure seamless integration between client and server layers.
- Implemented **Spring Security** for secure authentication and authorization mechanisms, enhancing client data protection.
- Delivered clean, modular, and testable code for various client projects in adherence to **Agile practices**.

PROJECTS

Central Public Work Department (CPWD):

Justification:

- Developed a government-focused application using **Spring Boot**, **JPA**, and **Spring Security** ensuring secure and efficient access control for public and private users.
- Built a responsive **UI Dashboard** using **React**, **HTML/CSS**, and **JavaScript**, integrating seamlessly with backend services.
- Designed and implemented database schemas using **Hibernate ORM** and **MySQL**, ensuring data consistency and optimized queries.
- Secured the application with **Spring Security** by implementing role-based authentication and authorization mechanisms.

Delhi Health and information Management System (DHIMS):

Justification:

- Created a robust hospital resource management system leveraging **Spring Boot**, **Spring Security**, and **JPA** for seamless data management.
- Designed RESTful APIs to support key functionalities like bed availability tracking, patient booking, and resource allocation.
- Utilized **Spring Security** to implement role-based access control for administrators, doctors, and patients.
- Developed a customizable slider module and dynamic UI components using **JavaScript** and **Bootstrap** for a better user experience.
- Integrated the application with **MySQL**, optimizing database queries for faster response times.

Learning Management System (LMS):

Justification:

- Designed and built a scalable **Spring Boot** application for managing online educational resources and user interactions.
- Implemented multiple RESTful APIs for functionalities such as **assignment management**, **grade tracking**, **chat services**, and **payment processing**.
- Integrated **JPA** with **MySQL** to ensure efficient database interactions and manage complex relationships between entities.
- Secured APIs and user authentication using **Spring Security**, enabling secure user registration, login, and role-based access.
- Conducted rigorous testing of APIs using **Postman** and documented the application flow with **Swagger** for developer clarity.

Portfolio:

Justification:

- Designed and developed a full-stack portfolio application using **Spring Boot for backend services** and **React (Vite)** for a fast and modern frontend user experience.
- Built and consumed **RESTful** APIs for managing projects, user profiles, and dynamic content, ensuring seamless integration between frontend and backend.
- Implemented a responsive and interactive UI using **React**, **HTML/CSS**, and **JavaScript**, enhancing user engagement and performance.
- Integrated JPA with **Postgres** to efficiently manage relational data, including projects, technologies, and user details.
- Secured the application using **Spring Security with authentication and role-based authorization** mechanisms.
- Containerized the application using Docker for consistent development and deployment environments.
- **Implemented CI/CD pipelines using Git-based workflows to automate build, testing, and deployment processes.**
- Deployed the application on **AWS (e.g., EC2)** ensuring scalability, high availability, and reliable production hosting.

EDUCATION

- Master of Computer Applications (MCA) – Integral University, Lucknow | 2017–2019
- Bachelor of Computer Applications (BCA) – Makhanlal Chaturvedi University, Bhopal | 2012–2015
- 12th (PCM) – Inter College, Kaptanganj, Azamgarh | 2012
- 10th – SBS Inter College Terhi, Azamgarh | 2010

Certifications & Achievements

- Excellent Learner of the Year – 2022 (Tech adaptability and quick learning)
- Excellent Performer of the Year – 2023 (Consistent delivery and ownership)

Additional Information

- Date of Birth: 22 April 1996
- Languages Known: English, Hindi
- Marital Status: Married
- Nationality: Indian
